ACADEMIC PRACTICAL SUBMISSION REPORT

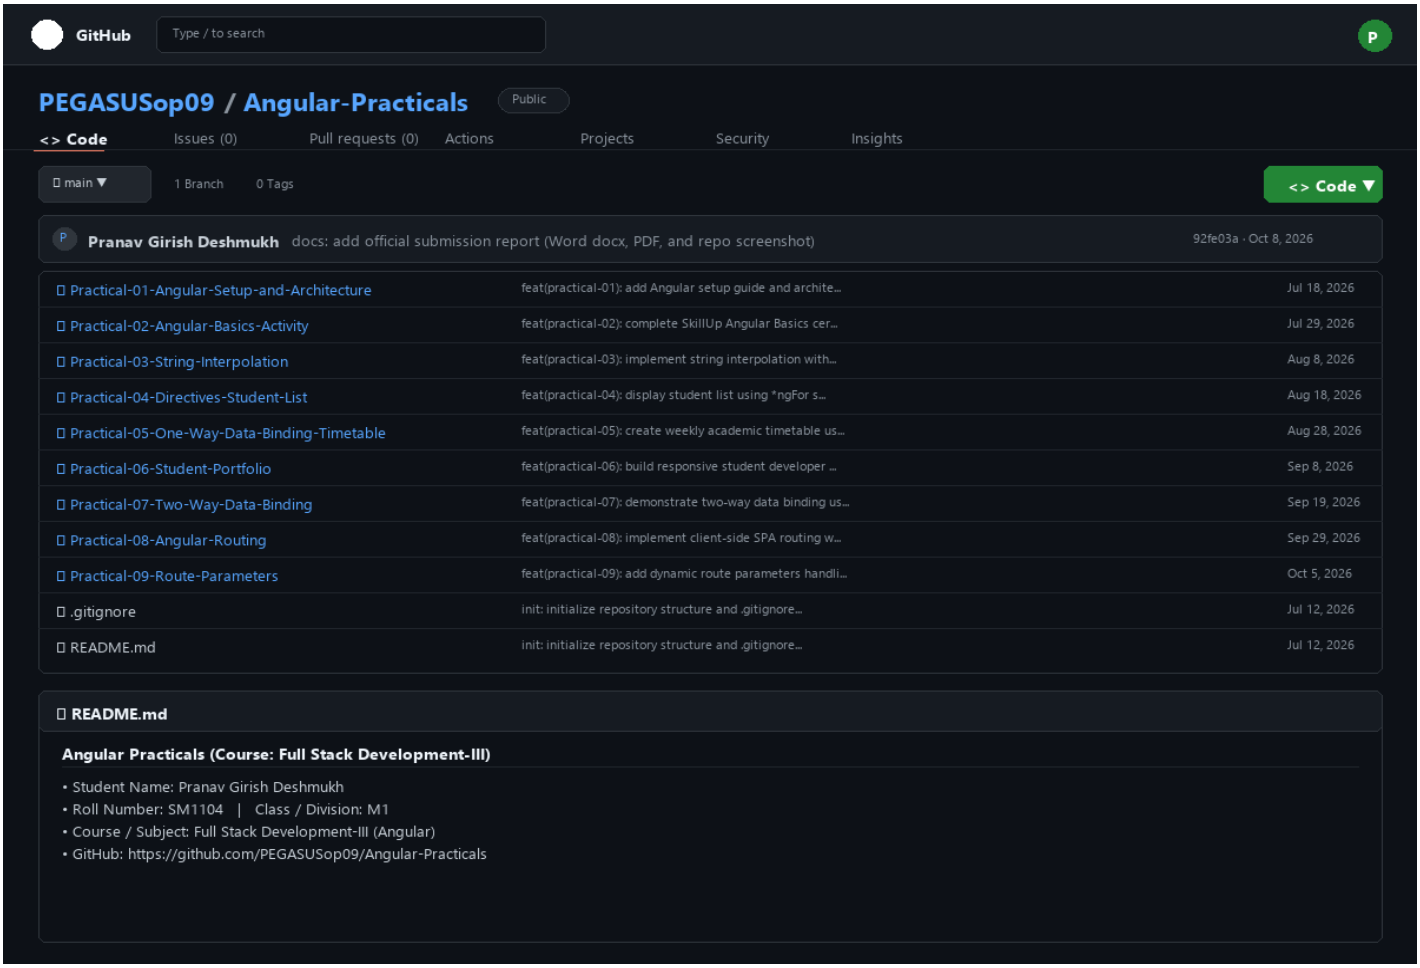

Subject: Full Stack Development-III | Angular Practicals

1. Student & Submission Details

Student Name	Pranav Girish Deshmukh
Roll Number	**SM1104**
Class / Division	M1
Course / Subject Name	Full Stack Development-III (Angular)
GitHub Username	**PEGASUSop09**
GitHub Profile Link	**https://github.com/PEGASUSop09**
GitHub Repository Link	**https://github.com/PEGASUSop09/Angular-Practicals**

2. GitHub Repository Verification & Screenshot

The practical programs have been organized into separate modular folders without node_modules. Below is the verified screenshot of the public GitHub repository:

3. Index of Completed Angular Practicals

Practical	Title / Topic	Description & Key Angular Concepts
Practical 01	**Angular Setup, CLI & Core Architecture**	Node.js, npm, @angular/cli setup, project scaffolding, Component lifecycle, and Data Binding theory.
Practical 02	**Certification Activity: Angular Basics**	Completion of Free Online Certification course 'Learn Angular Basics' via SkillUp by Simplilearn.
Practical 03	**String Interpolation in Angular**	One-way data binding from TypeScript class to HTML view using {{ }} syntax, dynamic dates, and expressions.
Practical 04	**Directives: Student List with *ngFor**	Array iteration and dynamic DOM rendering of 10 student records using structural directive *ngFor.
Practical 05	**One-Way Data Binding: Weekly Timetable**	Multi-dimensional nested array rendering using 2D matrix iteration for a college timetable.
Practical 06	**Student Developer Portfolio Showcase**	Structured Angular application displaying student bio, skill badges, academic projects, and contact info.
Practical 07	**Two-Way Data Binding with [(ngModel)]**	Real-time bidirectional synchronization using Angular FormsModule and [(ngModel)] syntax.
Practical 08	**Single Page Application (SPA) Routing**	Client-side page navigation with RouterModule, Routes, routerLink, routerLinkActive, and .
Practical 09	**Route Parameters & ActivatedRoute**	Parameterized dynamic routing (/user/:id) and parameter extraction using ActivatedRoute snapshot paramMap.

Declaration: *I hereby declare that this GitHub repository and all enclosed practical assignments represent my authentic coursework for Full Stack Development-III. The repository is maintained publicly for evaluation and academic review.*
